Here is the HF activity schedule that we spoke about.

In addition to the Killdeer sampling, it is showing that the Homeowner reports should have already been sent out for Raton. Rick needs, at least, the Round 1 data finalized so that homeowner reports can be generated to give to residents so that sampling can commence the first part of November.

Attached is the updated activities calendar for HF/Pav related work. Obviously the Pav column is in flux and is waiting decisions from above. It will likely be retooled in the near future. Of particular importance is the HF Case Study table (p. 2-4; landscape view). This provides the proposed schedule for hitting the field. Susan Mravik is going to be putting this into a Gantt chart view. Let me know your comments.
